

2015 to 2023 Ford F150 2015 to 2023 Ford Expedition 2015 to 2023 Ford Raptor Anti-Theft Plate

Installation Instructions

HARDWARE INCLUDED WITH YOUR ANTI-THEFT PLATE

Step 1

- Locate the 2-17 mm bolts at the front crossmember
- Remove the felt cover and associated brackets
- You can leave the factory bolts in or you have the option to use the bolts provided with the tamperproof head on the front crossmember and you use the clips and tamperproof bolts for the rear crossmember.

Step 2

- Remove or loosen to slide the plate up in the slotted section in the front of the plate
- If you choose to keep the factory bolts, then you can take the four isolators and split them on one side and wrap around the bolt or you can totally remove the bolts and install the new one with the isolators two to each bolt. Whichever hardware you decide to go with reapply blue Loctite (not included in the kit).
- Locate the slots in the rear crossmember and install your clip, turn 90* to the slot so it lines up with a hole in the rear of the plate then install your hardware and isolator
